

OPERATION CARD

Tidal Shuffle

Follows the song TIDAL plays, chooses a related one, and plays it when the song ends.

AE-TS-00 · REV 0.12.0

3 OCTOBER 2026

1 Install, once

```
git clone -b claude/blissful-pasteur-dw57cr \
  https://github.com/canyoubarrett/vim.git ~/tidal-shuffle-src
cd ~/tidal-shuffle-src/tidal-shuffle && ./install.sh
tidal-shuffle login      # approve the link
tidal-shuffle doctor     # fix what it marks
```

2 Run

Play a song in TIDAL, then `tidal-shuffle run`. Leave the window open.

Options: `--preset chill`, `--flow rising`, `--plain`.

3 Update

Quit with `q`, then `tidal-shuffle update`. Settings and pictures are kept.

4 When something is wrong

- `tidal-shuffle doctor`: checks every part, says how to fix it.
- TIDAL plays its own song first: allow Terminal in Accessibility.
- "could not start": `tidal-shuffle inspect --watch 20`, send it.
- Boxes with question marks: Esc → Picture detail → Medium.

5 Keys

`space` play / pause

`n` next pick

`b` back

`f` next flow

`p` presets

`l` lyrics

`a` album cover

`t` shuffle tree

`esc` settings

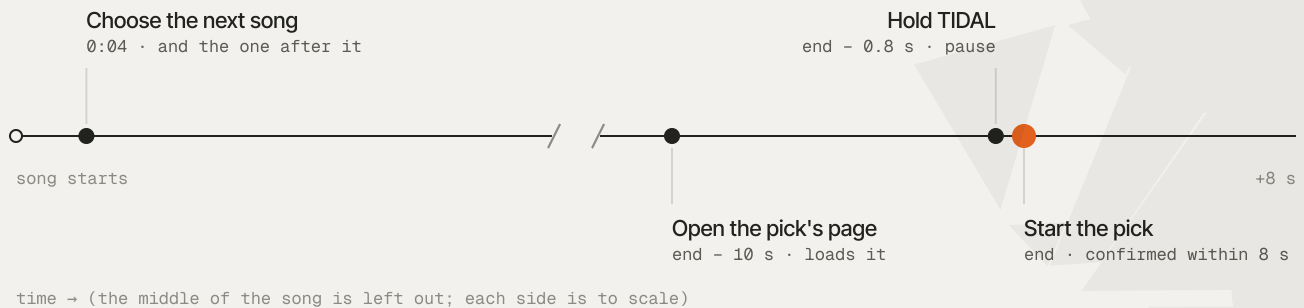

`q` quit

`»»` `»»»` `««` work too while the window is in front.

Everything can be clicked.

6 Settings `esc`

`↑` `↓` move, `←` `→` section or slider, `enter` choose, `esc` close. Themes, logo, backdrops, picture detail, lyrics and the Spotify API: the preview shows each before you choose.

EVERY SONG · THE NEXT IS CHOSEN EARLY, THE PICK STARTS AS THE SONG ENDS
